

**Simin Zhou**

**Vice President, Digital Manufacturing Technologies**

**UL**

Simin Zhou is the Vice President of Digital Manufacturing Technologies at UL, a global independent safety science company. Her work in 3D Printing & Additive Manufacturing focuses on providing widely available training and education, simplifying and improving compliance of equipment and materials, and developing infrastructure to support quality and safety of 3D printed parts and products. Simin serves on the Governance Board of America Makes and the Advisory Board of Milwaukee School of Engineering Rapid Prototyping (Additive Manufacturing) Center. Simin is passionate about technology and innovation.

Simin holds an MBA from Harvard Business School and graduated summa cum laude in Computer Engineering from University of Minnesota. Simin also has hands-on software engineering and product management experience from ADC Telecom, Tyco Healthcare, 3M and Intel.
